TECHNICAL DATA SHEET

PRODUCT EP340 CLEAR LAMINATE RESIN

DESCRIPTION A solvent free clear pourable gloss finish for various high wear areas to give a

"glass look" such as table tops, bars and for special effects such as decoupage.

May also be used to fill holes in surfaces such as timber or concrete.

Selected pigments and dye solutions can be added to create translucent colours and special effects, and small inert objects such as stones, gems, coins, shells

etc. can be embedded into the liquid mix

PROPERTIES

COLOUR Water white Clear.

GLOSS LEVEL Full gloss

TECHNICAL DATA

MIXING RATIO 2 Parts A : 1 Part B by Volume

APPLICATION Timber substrates must be seasoned and dry. EP340 Clear Laminate Resin is

designed to fill imperfections in timber such as knot holes and rough sawn areas. For best results, a light continuous coat of EP340 should be applied as a sealer coat. It should be left for 24 hours and lightly scuffed with 240-320 grit

sandpaper. The final application of the EP340 can then be carried out. Mix the Part A Resin and Part B Hardener well. Take care not to mix too vigorously to keep air entrapment to a minimum. Air bubbles may form in the surface of the pour. The release of these bubbles is enhanced be the use of a heat gun held at 15-20 cm from the surface and sweeping it continuously across the

surface.

The mixture should be cured in a dust free area preferably at a temperature

between 15-25°C and below 85% Relative Humidity

THINNING Not required – ready for use as supplied

CLEANUP Equipment can be cleaned with Acetone or Methylated Spirits

GENERAL Refer to the SDS for correct handling and storage.

Use in a well ventilated area and wear safety glasses and impervious gloves.
