TECHNICAL DATA SHEET

PRODUCT

PAINT STRIPPER

DESCRIPTION

High grade, non-flammable, fast acting paint remover for metal and wood.
Does not require neutralizing.

DRYING CYCLE

Fast acting - for best results avoid using in hot sunshine or when exposed to windy conditions.

SURFACE PREPARATION / APPLICATION GUIDE

Flow on a heavy, even coat of paint stripper using a soft bristle brush. Stroke the brush in one direction only.
If applied by spray, open nozzle wide to assure heavy, even coat. Let stand until old finish is blistered completely or softened sufficiently for removal.
Do **NOT** rush the job.
Let the paint stripper do the work.
Remove old finish with painter's scraper, steel wool or rags.
No "after-wash" or "neutralizing" necessary.
Will safely remove paint, enamel, lacquer, shellac, plastic, varnish, etc. from wood metal, plaster or masonry.
Specially recommended for overhead or vertical surfaces.
Will not remove stain from timber or raise the grain.
Do **NOT** use on vinyl or plastic.

WARNING

Volatile solvent.
Use with adequate ventilation.
Avoid prolonged or repeated breathing of vapour.
Avoid prolonged or repeated contact with the skin.
Do **NOT** take internally.
If paint stripper causes skin to smart or burn, wash off **IMMEDIATELY** with clear water.
