

GRILL

High Temperature Grill Cleaner

→ DESCRIPTION

An effective high temperature cleaner for the grill. Heat-activated and pre-measured to remove baked on soils from grills.

→ BENEFITS

- Quickly clean grills and hot plates mid-service
- No need to cool down grill before cleaning
- Quickly and effectively removes greases and fats
- Easy to use chamber bottle giving a pre-measured dose

→ APPLICATION

For cleaning grill surfaces in quick service retail and hospitality settings.

→ DIRECTIONS FOR USE

With the cap loosened slightly, measure 100mL of Domsafe Grill into the receiving chamber by carefully squeezing the bottle. Do NOT pre-cool grill surface.

Wearing protective gloves, open cap and apply all over the entire grill surface. Use a scraper to move the cleaning liquid over grill surface and loosen fixed soil. Pour water over the grill and scrape any remaining liquid into the grease tray.

Ensure adequate ventilation is available when using.
