

## → DESCRIPTION

A highly effective biological cleaner for grease traps and drains.

## → BENEFITS

- Non-caustic and non-corrosive
- Keeps grease traps and drains flowing freely
- Contains a special blend of bacterial spores that produce lipase enzymes to clean fats as well as other extracellular enzymes to degrade food solids and sludge
- Contains Bacillus bacteria in 100% spore form for extended product life and product stability
- Can be used manually or via an automatically dispensed timer feeder

## → APPLICATION

Bioflow can be used in grease traps and drains across a wide range of industries including hospitality, food manufacturing and meatworks.

## → DIRECTIONS FOR USE

### ELECTRONIC FEEDER

For best results use an electronic feeder to dispense into the drain leading to the grease trap.

The feeder should be set up at least 3 metres away from any dishwasher to prevent hot water affecting the product. Set feeder to dispense 30-60mL every 3 hours.

### MANUAL DOSING

1. Add 125-250ml to 5L of luke warm water
2. Pour into the drain after the breakfast or lunch session has been completed and the dishwasher is turned off
3. Repeat step 1, at the very end of the day.

Avoid pouring any strong sanitisers into the drain as it may deactivate the product or reduce its activity.
