

# HYPERSAN

# Concentrated Sanitiser

## → DESCRIPTION

Hypersan is a concentrated sanitiser containing a special blend of quaternary ammonium compounds that kill a broad spectrum of bacteria and effective in hard water.

## → BENEFITS

- Contains a 4th generation quaternary blend with 10% quaternary ammonium compound
- Highly concentrated making it extremely economical
- At a dilution of 2mL/L (1:500), Hypersan is classified as a no-rinse sanitiser
- Kills more than 99.999% of bacteria on clean surfaces
- Used at the recommended dilution rate, Hypersan provides 200ppm quaternary ammonium compound
- Neutral pH

## → APPLICATION

Hypersan is suitable for use in all food contact and preparation areas.

## → DIRECTIONS FOR USE

1. Thoroughly clean all surfaces with a suitable detergent solution and rinse with potable fresh water before sanitising with Hypersan.
2. Spray on Hypersan using a pressure cleaner, foamer, backpack sprayer or trigger spray. It is important to cover the entire area that needs sanitising with the Hypersan solution.
3. Leave on surface. Hypersan is classified as a no-rinse sanitiser at a dilution of 2mL/L (1:500). If used stronger than recommended, surfaces must be rinsed before processing food.

Do not spray over food. Do NOT use as a food sanitiser. Surfaces must be adequately drained before processing operations resume.

*Do not mix with soap or detergents as this will deactivate the active ingredient.*

Application	Surface Soil Level	Dilution Rate	Dilution Rate mLs	Directions
Spray & Wipe	Clean	1:500	2mL/750mL	Spray and leave.
Spray Pack Sprayer, foamer, pressure cleaner	Clean	1:500	10mL/5L	Spray and leave.

*If using trigger spray bottle - at least once a week, empty bottle, rinse with water and allow to dry before refilling.*
