

## MANUFACTURER DECLARATION

Dominant Spray & Wipe Sanitiser has been evaluated by an independent third party laboratory for its bactericidal effectiveness as a chemical sanitiser.

The testing evaluation showed that Spray & Wipe Sanitiser has a >99.9% kill rate of bacteria when applied at ambient temperature on a hard surface as detailed in the Technical Bulletin/product label directions and left on the surface for at least 2 minutes.

Dominant Spray & Wipe Sanitiser can be used as a one step cleaner sanitiser on light to moderately soiled hard surfaces. For heavily soiled hard surfaces, they must be cleaned with a suitable detergent solution and rinsed with potable water before using Spray & Wipe Sanitiser.
