

clostridium difficile

disinfection

LCC

procedure for all washable surfaces

Use at a dilution of 60ml made up to 500ml. This gives 5000ppm chlorine

1. Using 30ml pump dispense 2 pumps into 500ml bottle. Top up with cold water.
2. Spray onto surface or squirt on and spread over with cloth.
3. Leave to act for 10 minutes then wipe off.
4. Discard any contents left at the end of day, rinse and allow bottle to drain and dry.
