4 All
Technical Bulletin

Product Description

4 All contains cleansers derived from wheat and coconut oil, plus special water soluble emollient esters to leave the skin feeling silky soft.

4 All does not leave soap scum deposits in hard water areas making showers and basins much easier to clean.

The pH of 4 All is 5.6. This maintains the natural pH balance of the skin, unlike soap based products that can have a pH in the range 9 – 10 which leads to degreasing of the skin.

4 All is available in the Dominant Star System containers. These sealed units prevent risk of cross contamination, and are economical as only 1ml is dispensed with each pump.

Applications

Either use through a refillable dispenser, or simply insert a new unit into the Star System dispenser.

Refillable dispensers should be washed and dried before refilling for maximum hygiene. If this is not possible, then always refill when the dispensers are empty or nearly empty.

As a hand cleanser, wet hands, apply to hands, lather, then rinse with water and dry.

As a body cleanser, apply to a sponge, lather and rinse.

For use as a hair shampoo pour about 5ml into the hands and work up to a lather in wet hair. Rinse off with water and condition if required.

Technical Data

4 All is based on a blend of naturally derived cleansers derived from coconut oil and wheat.

It has a pH of 5.6 to maintain the natural pH balance of the skin.

The cleansers in 4 All are all classified as biodegradable.
