

4 Control

Technical Bulletin

Product Description

4 Control is a clear blue liquid hand cleanser with a mild citrus fragrance.

It is recommended for use as an antimicrobial hand cleaner in food preparation areas.

Applications

4 Control contains a blend of biodegradable cleansers from plant origin to cleanse, as well as emollients that are naturally found in the skin to improve moisture retention.

The pH of 4 Control is 5.5. This maintains the natural pH balance of the skin, unlike soap based products that can have a pH in the range 9 – 10 which leads to degreasing of the skin.

4 Control contains 0.3% Triclosan as an antimicrobial active.

4 Control is available in the Dominant Star System containers. These sealed units prevent risk of cross contamination, and are economical as only 1.5ml is dispensed with each pump.

Technical Data

4 Control contains a blend of biodegradable cleansers derived from plant sources.

It has a pH of 5.5 to maintain the natural pH balance of the skin
