

Breakaway

Technical Bulletin

Product Description

Breakaway contains high levels of detergent, alkaline builders and solvent. This gives excellent grease cutting ability making it suitable for heavily soiled areas such as abattoirs, boning rooms and commercial kitchens.

The detergents used in Breakaway have a medium to high foam level that produces a stable foam when used through foaming equipment. This gives a long contact time for better cleaning.

Applications

How To Use

Breakaway is used for cleaning floors, walls, benches etc. Use at dilutions from 1:10 to 1:80, dependent on degree of soiling. For general cleaning use at a dilution of 1:40 (1 cup in 10 litres of water).

Rinse all food contact surfaces with potable water after use.

Breakaway works best in warm to hot water as this softens fatty deposits making them easier to remove. If blood is present always rinse with cold water first to prevent setting.

Breakaway has a medium to high foam level. It is suitable for use manually or through a foam gun. Not recommended for scrubbing machines due to the high foam level.

Breakaway is not recommended for cleaning aluminium. For aluminium cleaning we recommend the use of Super Active, PX 22 or Gorilla.

Dilution Rates

General Hard Surfaces: Use at dilutions from 1:10 (100ml/L, 10%) to 1:80 (12.5ml/L, 1.25%) dependant on the type of application and degree of soiling.

Technical Data

Breakaway is a highly alkaline liquid cleaner containing water softening agents, alkaline builders, a blend of biodegradable detergents and a solvent. This complex blend gives highly effective removal of grease and oils from hard surfaces.

Breakaway has a pH of 13.4 in the neat form and 11.0 when diluted 1:100.

Breakaway has a medium to high foam level.

Pack Sizes

Carton (2x5L Bottle)	C23818
15L Drum	C19398
200L Drum	C20019
