## Pristine Clean

Please read all directions thoroughly before proceeding. For further information about leather care, visit [www.leatherique.com.au](http://www.leatherique.com.au).

Leatherique® Pristine Clean Leather Cleaner #2 stands as the preferred choice of professional detailers for cleaning leather, faux leather, and vinyl. It effectively eliminates dirt, grime, perspiration, and body oils from your leather and vinyl surface, leaving them clean without any greasy residue, unpleasant odours, or dryness.

Formulated to efficiently tackle dirt while remaining gentle on a wide range of leather materials, Pristine Clean boasts a pH-neutral composition designed to preserve natural fibres.

Pristine Clean may also be used on vinyl and rubber window trim to soften, condition, and improve flexibility, and can be used to clean and leave a natural matt finish on black rubber bumpers and tires.

For hard, brittle leather, prior application of Leatherique® Rejuvenator Leather Conditioner #1 is recommended. Pristine Clean does not remove the Rejuvenator permeated into the leather.

### Materials

- Leatherique® Pristine Clean Leather Cleaner #2
- White microfibre cloth or paper towel
- Nitrile or latex gloves

### Application

- Vacuum the surface well or use a soft brush to remove large particles of dirt, paying particular attention to seams, folds and cracks.
- Spray Pristine Clean directly onto the surface to be cleaned or wipe on using a slightly damp white microfiber cloth. **Note:** use of a white cloth or paper towel assists in identifying if leather dye or coating is being removed during the cleaning process.
- Utilise a brush to gently agitate dirt from the leather grain. For delicate leathers, opt for a soft-bristle brush, while medium bristle brushes are suitable for furniture and car leather.
- Avoid vigorous rubbing with a cloth, as this may remove leather coatings. Rinse the microfiber cloth regularly with warm water.
- Let stand for 5-10 minutes and wipe the surface with a soft, damp cloth.
- Rinse the soft cloth in warm clean water, ring dry, wipe again.
- After all the dirt has been removed, gently buff to a luxurious finish with a clean, dry, soft cloth.

### Stains

If staining of your leather occurs, act swiftly to prevent stains from setting in permanently. If available, use Leatherique® Rejuvenator first, allow time to soak in and then spray Pristine Clean onto the stain and wipe promptly with a lightly damp microfiber cloth.

Having Pristine Clean readily available enables timely treatment of accidents, minimising the risk of enduring stains.
