

COIL BRITE

AIRCONDITIONER COIL CLEANER

DESCRIPTION

COIL BRITE is a very powerful alkaline coil and condenser cleaner. The surfactants, emulsifiers and penetrating action of **COIL BRITE** help to clean deep within coils and to help bring contaminants out of coils and condensers. This will help with airflow enormously and will make a huge difference to the "Head Pressure" of the Air Handling System.

In commercial situations, 100% clean and well maintained Air Handling Systems deliver up to 25% more efficient electricity bills.

February 2016 Technical Data Report

APPLICATIONS

For use by Refrigeration Mechanics, Refrigeration Companies, Mining Companies, Automotive Repair Industry.

TECHNICAL DATA

FORM: Liquid ODOUR: Faint Alkali COLOUR: Pale Red SPECIFIC GRAVITY: 1.2 g/ml TOXICITY: Poison S6 WETTING ABILITY: Excellent STORAGE ABILITY: 1 year + STABILITY: Stable PHOSPHATES: N/A FLASH POINT: N/A BOILING POINT: >100°C SOLUBILITY IN WATER: 100% DETERGENCY: Excellent %VOLATILE BY VOLUME: 75% pH: 13+ VISCOSITY: Thin EVAPORATION RATE: Slow BIODEGRADABILITY: Yes

DIRECTIONS FOR USE

COIL BRITE may be diluted at up to 25 to 1 giving a 1% cleaning solution, however best results are obtained at between 3 to 1 and 10 to 1 with water.

1. Mist coils highly with water and then spray liberally with COIL BRITE.

2. Allow **COIL BRITE** to penetrate and deoxidise cells for approximately 2 to 5 minutes (foaming will occur) then flush with water, **COILS should then be as new.**

Workplace Health and Safety regulations require safer products to be substituted for more hazardous products where possible.

COIL BRITE, being alkaline, is a far safer product than hydrofluoric based acid aluminium cleaners, which have been proven to be carcinogenic.
