

STAF

DESCRIPTION

Staf is an EPA registered and USDA authorised disinfectant, deodorant and air sanitiser with a quaternary disinfectant for quick effective germicidal action. Glycolised for effective air sanitisation. Pleasantly scented to leave room fresh and free of odours. Kills staphylococcus Aureus, Pseudomonas Aeruginosa, Salmonelle Choleraesuis. Controls mould, mildew and fungus. Virucidal against HIV-1 (AIDS Virus)

APPLICATIONS

Nursing Homes, Hopitals, Institutions, Offices, Schools, Motels and Hotels.
For air freshening, deodorising, air sanitising, disinfecting and germ killing.

TECHNICAL DATA

FORM: Alcohol base aerosol
ODOUR: Moderate fruity
COLOUR: Clear
DETERGENCY: None
TOXICITY: 1000ppm OSHA TLV
WETTING ABILITY: Saturates
STORAGE ABILITY: 1 Year +
COLD STABILITY: -17.6°C
FLAME EXTENSION: Puts out flame

SOLUBILITY IN WATER: 50%
SPECIFIC GRAVITY: 0.84
%VOLATILE BY VOLUME: 35%
pH: 8.0
PHOSPHATES: None
EVAPORATION RATE: Slow
BIODEGRADABILITY: No
FLASH POINT: 26.5°C TCC
PROPELLANT: Hydrocarbon

DIRECTIONS FOR USE

DIRECTIONS FOR USE

Surface Disinfection and Deodorisation

First remove soil deposits from surface to be treated. Hold can 15cm from surface and spray until completely wet. Allow the surface to remain wet for 10 minutes.

Air Deodoriser and Air Freshener

Point upwards to centre of room and spray for 3 seconds.

Mildewstat

To control mould and mildew on hard non-porous surfaces, spray the surface to be treated, making sure to wet competely. Let air dry. Repeat application at weekly intervals or when mildew growth reappears.

For use in vehicle airconditioning systems, with engine running and airconditioner on maximum speed and cooling, spray the product into the air intake vent. Hold can 20-30cm above the vent while spraying 4-6 seconds. Make sure the spray tip is pointed directly at the intake vent before spraying. The recirculation system will pick up the product and the entire system will be deodorised in seconds. Shut off engine and airconditioner after applying the product.
