

**FISH OIL 100%**  
Deodorised Deep Sea Fish Oil

**DESCRIPTION**

Fish Oil protects joints that have been welded. Fish Oil penetrates through rust to give a barrier to the main steel structure and fish oil prevents further rusting.

**APPLICATIONS**

**DEODORISED FISH OIL** inhibits the formation of rust on structural steel, metal gates, bridge, pontoons, railings as well as internal box section, door cavity sills and internal steel structures of cars and trucks.

**TECHNICAL DATA**

<b>FORM:</b>	<b>FLASH POINT:</b>
<b>ODOUR:</b>	<b>FLAME EXTENSION:</b>
<b>COLOUR:</b>	<b>SOLUBILITY IN WATER:</b>
<b>DETERGENCY:</b>	<b>SPECIFIC GRAVITY:</b>
<b>TOXICITY:</b>	<b>%VOLATILE BY VOLUME:</b>
<b>WETTING ABILITY:</b>	<b>pH:</b>
<b>STORAGE ABILITY:</b>	<b>PROPELLANT:</b>
<b>COLD STABILITY:</b>	<b>EVAPORATION RATE:</b>
<b>PHOSPHATES:</b>	<b>BIODEGRADABILITY:</b>

**DIRECTIONS FOR USE**

**Directions for use:** FISH OIL may be diluted with white oil. White oil helps to spread the oil evenly and then evaporates, leaving only the fish oil. Fish Oil may be mixed with DEFENSE (Minehan Metal Parts Protector), this will give the surface a much drier feel more quickly.
