

ALKALINE ALUMINIUM CLEANER

NON ACID, SAFE ALUMINIUM CLEANER

DESCRIPTION

ALKALINE ALUMINIUM CLEANER is a non-hydrofluoric acid aluminium cleaner.

ALKALINE ALUMINIUM CLEANER has been developed to suit the refrigeration industry for the cleaning of aluminium coils and evaporators.

APPLICATIONS

Refrigeration Industry, Industrial Companies, Trucking Companies – Aluminium Tankers and Spray Painting Operators.

TECHNICAL DATA

FORM: Liquid
ODOUR: Faint sweet
COLOUR: Pink
DETERGENCY: Excellent
TOXICITY: Toxic Class 8
WETTING ABILITY: Excellent
STORAGE ABILITY: 2 years
COLD STABILITY: Yes
PHOSPHATES: Nil

FLASH POINT: Nil
FLAME EXTENSION: Nil
SOLUBILITY IN WATER: Yes
SPECIFIC GRAVITY: 1.18 to 1.2
%VOLATILE BY VOLUME: 75%
pH: 13+
PROPELLENT: Nil
EVAPORATION RATE: Slow
BIODEGRADABILITY: Yes

DIRECTIONS FOR USE

DIRECTIONS FOR USE

Best results are achieved when the coils are wetted first with water, then sprayed with diluted **ALKALINE ALUMINIUM CLEANER**. For heavy oxidation (approx. 8-10 years build up), a dilution rate of approximately 3-5 to 1 with water will achieve very effective results.
