PARTS WASH

DEGREASER

DESCRIPTION

PARTS WASH is a high flash solvent based degreaser for use in recirculating parts washing machines. **PARTS WASH** is a combination of solvents and detergents to give superior grease cutting qualities for the quick removal of heavy built up grease and dirt on engine parts.

PARTS WASH is made with a high flash solvent for safety reasons. It is combustible but will not catch fire as easily as other parts wash solvents which are often used in these types of machines, like petrol, kerosene and mineral turpentine. These solvents will ignite quickly.

For use by Councils, Workshops, Service Stations, Railways, Engineering Workshops and Mining Industry.

TECHNICAL DATA

FORM: Liquid
ODOUR: Solvent
COLOUR: Brown
DETERGENCY: N/A
TOXICITY: N/A

WETTING ABILITY: Saturates STORAGE ABILITY: 1 year +

STABILITY: Stable PHOSPHATES: Nil

FLASH POINT: >61°C
BOILING POINT: 150-280°C
SOLUBILITY IN WATER: No
SPECIFIC GRAVITY: N/A
%VOLATILE BY VOLUME: >90%

pH: N/A

VISCOSITY: Thin

EVAPORATION RATE: Slow BIODEGRADABILITY: No

DIRECTIONS FOR USE

Empty the presently used solvent from the machine. Remove sludge from the bottom and dispose of thoughtfully. Add **PARTS WASH** solvent to the machine and circulate as normal.
