# NEAT CUT D

## NEAT CUTTING OIL

**PEAK NEAT CUT D** is a heavy, transparent, active, non-emulsifying, high additive EP cutting oil for use on ferrous metals, stainless and nickel/chrome hi-tensile steels. It is mainly confined to uses where a high viscosity oil is required. Pipe threading by hand or machine are typical applications.

**PEAK NEAT CUT D** can also be used on stainless and nickel / chrome steels. It is suitable for machining steels in various types of lathes – automatics, turrets and hand screw machines. Being high in extreme pressure antiwear additive, it is generally used on heavy duty operations such as gear cutting, broaching, turning, threading and tapping.

**APPLICATION:** Used neat.

# 205L
