

STELLA™ HT 300 CHAIN OIL

HIGH TEMPERATURE FOOD GRADE CHAIN OIL

DESCRIPTION & APPLICATION:

STELLA™ HT 300 CHAIN OIL is a food grade high temperature chain lubricant formulated using special polar biodegradable oil and advanced rust and oxidation inhibitors to give a long-wet film life at high temperatures. The highly polar molecules strongly adhere to the surface of the chain and can withstand high temperatures, at the same time keeping the moving parts moving freely due to its highly viscous lubricating film.

STELLA™ HT 300 CHAIN OIL is designed for the lubrication of conveyor chains and bearings running continuously at high temperatures, up to 300°C, and short periods up to 320°C, on textile stenters, drying machines, bakery ovens and on paint stoving chains.

BENEFITS:

- Long fluid life at high temperatures
- Does not form hard carbon deposits
- Excellent load and anti-wear properties
- Lubricity maintained at high temperatures
- Safe for use in HACCP Certified Food and Packaging Manufacturing Plants
