ALCOHOL SPRAY

Sanitising Aid

Description

ALCOHOL SPRAY 70% contains 70% ETHANOL and is suitable for industrial cleansing where minimal water and low odour is desired.

ALCOHOL SPRAY 70% is ideal for spot cleaning in printing, foundry, chemical formulators etc. The water component in the spray reduces the "flashing off" of ethanol so that the contact time (and sanitizing time) is increased.

Application

ALCOHOL SPRAY 70% is readily available and inexpensive. It is often a suitable alternative to methylated spirits. The risks associated with human contact with **ALCOHOL SPRAY 70%** are minimal. It is a clear colourless liquid miscible in water. **ALCOHOL SPRAY 70%** is for use in industrial cleaning of benches and hard surfaces and is useful as a mild sanitizer.

Directions

Use neat. Spray onto surface to leave a thin film and allow to air dry. Do not spray directly on to foodstuffs.

CAUTION Avoid contact with eyes and avoid breathing vapour or spray mist.

IMPORTANT NOTICE TO CUSTOMER

Since the use of this product is beyond the control of either seller or manufacturer, their only obligation shall be to replace any quantity of product which is proven defective. They cannot assume any risk or liability in excess of the purchase price of the product itself, which does not include labour or any consequential damages resulting from the use of this product. Determining the suitability of this product for any intended use shall be solely the responsibility of the user.

ALWAYS TEST FIRST.

Packaging

◆ 5 Litre polyethylene drums ◆ 15 Litre polyethylene drums

Health Hazard
