Rinse Aid For Machine Dishwashing

Description

SAF T GARD TURBO RINSE is a drying agent which when added to the final rinse water of glass or dish washing machines, by means of a specially designed feeder, dramatically reduces drying time of washed articles. **SAF_T_GARD TURBO RINSE** also markedly improves the finished appearance of crockery, glassware and cutlery by eliminating water spotting.

Application

SAF T GARD TURBO RINSE is a green moderately viscous liquid and contains ingredients which, when mixed with water at 60-90°C rapidly lowers the surface tension of water and prevents water from forming droplets on a surface. This product is equally effective in both soft and hard water as it contains a water softener and antiscaling agents. **SAF_T_GARD TURBO RINSE** eliminates the need for manual toweling of washed articles, thus reducing the possibility of spreading pathogenic organisms due to this method of drying.

SAF_T_GARD TURBO RINSE is safe on all metals normally found in the construction of dish washing and glass washing machines.

Features and Benefits

- ❖ Effective in hard or soft water.
- ❖ Eliminates spotting and streaking.
- ❖ Safe on metals and plastic-ware.
- ❖ Economical to use.
- ❖ Contains an antiscaling agent.
- ❖ Colour coded for safety and identification
- ❖ Fitted with patented **Saf_T_Gard Close Loop system** to enable proper flow and increased end user safety

Directions

SAF_T_GARD TURBO RINSE is injected into the final rinse water on all machines by the use of highly specialised electronic dosing equipment that injects the correct amount of product each time the rinse cycle is activated. The results obtained with **SAF_T_GARD TURBO RINSE** are influenced by several factors, these being temperature of the final rinse water, efficiency of the dish washer rinse, residual heat held by the article being washed and the quantity of **SAF_T_GARD TURBO RINSE** used.
