VITALAN
ANTISEPTIC CATTLE TEAT OINTMENT
WITH VITAMINS A AND E

Active Constituents

2g/kg TRICLOSAN
 1.0m I.U./kg RETINYL PALMITATE
 0.5m I.U./kg dl-alpha TOCOPHERYL ACETATE

Description

VITALAN can be used as an aid in reducing bacterial infections on teat and udder cuts and abrasions in cattle

Application

VITALAN is a new concept in udder ointments. Tasman has utilised the concepts of cosmetic chemistry and skin science and applied them to the development of **VITALAN**. Research over the decade has shown that if certain vitamins are applied to the skin they will be absorbed into that area, and a locally high concentration of vitamins can be achieved compared to an equivalent oral dose. The high dose of vitamins that **VITALAN** achieves in the skin will lead to soft healthy udders. The better the skin tone, the less chance there is of infection.

VITALAN contains retinol, - Tocopherol and a skin grade biocide held in an emollient base. The biocide in **VITALAN** will kill bacteria found on the udder and reduce the chance of infection in cuts, cracks and grazes. The vitamins in **VITALAN** promote rapid healing of cuts, cracks and grazes, and if used regularly will improve the skin tone of the udder.

Features and Benefits

FEATURES

- Contains no harsh acids.
- Soothes itching skin.
- Promotes rapid healing of abrasions.

BENEFITS

- Has a realistic lanolin content
- Achieves a better skin tone.
- Deadly to bacteria.
