SELFOAM P

Alkaline Foaming Chlorinated Detergent

Active Constituents

120 g/ Potassium Hydroxide
50 g/L Available Chlorine

Description

SELFOAM P is a high foaming detergent and chlorine disinfectant, designed for use in the food industry as a one shot cleaner and sanitiser.

SELFOAM P is a viscous, light amber coloured liquid with a distinct chlorine odour. Combining the cleaning performance of high quality non-ionic and anionic detergents, with the proven disinfecting properties of chlorine.

Application

SELFOAM P is capable of handling the most difficult of grease and grime problems, while providing a cleaned surface free from microbial contamination.

SELFOAM P is so built that when used through foam cleaning equipment, it will produce dense foam that cling even to polished stainless steel surfaces. This property allows **SELFOAM P** to be easily used for cleaning throughout most food processing establishments where large areas of stainless steel have always presented cleaning problems.

SELFOAM P has also been built with a percentage of alkalinity in its formulation to make it suitable for use in red meat areas such as abattoirs, where both alkaline cleaners and foam additives have previously been necessary.

Directions

- | | |
|-----------------------|---|
| ➤ Foam cleaning - | Dilute 1 part to 9 parts water in holding tank |
| ➤ Pressure cleaning - | Dilute 1 part to 19 parts water in holding tank |
| ➤ Manual cleaning - | Dilute 1 part to 100 parts water. |

Product should be applied to surface, allowed to remain for a minimum of 5 minutes then hosed off with water
