

## VPS Citrus Silicone Spray

VPS Citrus Silicone Lubricant Spray produces a thin, non-oily, non-staining polymer film that lubricates and provides protection. VPS Citrus Silicone Lubricant Spray is not designed to leave surface glossy. Unfortunately, high-gloss silicone polymers produce a thick film that tends to remain sticky and attract dust and dirt. VPS Citrus Silicone Lubricant Spray tends to penetrate into small openings, providing lubrication and protection, leaving no stains or sticky mess.

---

### Application:

VPS Citrus Silicone Lubricant Spray should be used to lubricate door hinges, rubber mountings, drawers, windows, sliding doors, dies, etc. Waterproofs ignition systems, garden tools, fishing equipment and leather boots. Since surfaces treated with VPS Citrus Silicone Lubricant Spray repel water, boot lids, doors and locks can be protected from freezing.

---

### Easy to Use:

For large open areas, simply hold can upright 10-15 centimeters from the surface and spray. An extension tube is provided for hard-to-reach areas.

**Please Note:** Do not spray on freshly painted surfaces or surfaces that require painting.

---

### Features and Benefits

- Lubricates
  - Stops Squeaks and Sticking
  - Non-Staining
  - Stops Freezing of Trunk Lids, Doors and Locks
  - Leaves No Sticky Residue
-

# PRODUCT INFORMATION

This information only applies to products manufactured in the following location(s): Australia

Part Number	Pack Size
7263	300g

---

## Health and Safety

This product is not likely to present any significant health or safety hazards when used correctly in the right application. Safety Data Sheet (SDS) is available on request via your local sales office or 1800 804 658 or through our website [www.valvoline.com.au](http://www.valvoline.com.au)

## Protect the Environment

Take used oil to an authorized collection point. Do not discharge into drains, soil or water.

---

## Storage

Storage We recommend to store all packages under cover. In case outside storage is unavoidable, drums should be laid horizontally to avoid the possible ingress of water and damage to drum markings. Products should never be stored above 60°C, exposed to hot sun or freezing conditions.
