

## The Pump

The Pump is an emergency tyre inflator and sealer, providing temporary to tube or tubeless tyres. The Pump provides the convenience of not having to remove the wheel and is designed to enable you to drive home or to the nearest tyre repair.

**Note:** Travel at reduced speeds. Do not exceed 50km/h. Do not use on motorcycles, other two wheeled vehicles, outdoor garden equipment or non-automotive applications. Do not use in tyre side walls. This product may not be suitable for repair of large punctures.

---

### Features and Benefits

- Instant puncture repair to minor holes.
- Fixes flats immediately
- Excellent inflation and sealant qualities
- Designed to enable you to drive home or to the nearest tyre repairer
- Offers peace of mind

---

### Directions to Use

If possible, remove the cause of puncture. Shake can well before using. In extreme cold conditions we recommend that can is slightly warmed using vehicle heater. Attach hose by screwing on to valve stem. Hold can upright and expel entire contents of can. When completed, unscrew the hose and immediately drive slowly for 10-15 km to allow The Pump to cure. Adjust to normal tyre pressure as soon as possible.

**Note:** For your driving safety, have your tyre examined and permanently repaired by a competent repairer as soon as possible. Ensure contents of The Pump are removed and cleaned from the tyre and wheel as soon as possible. Before removing tyre from rim, the tyre should be deflated to completely expel the flammable gas in a well-ventilated area from ignition source or naked flame.

### **Health and Safety**

This product is not likely to present any significant health or safety hazards when used correctly in the right application. Safety Data Sheet (SDS) is available on request via your local sales office or 1800 804 658 or through our website [www.valvoline.com.au](http://www.valvoline.com.au)

---

### **Protect the Environment**

Take used oil to an authorized collection point. Do not discharge into drains, soil or water.

---

### **Storage**

Storage We recommend to store all packages under cover. In case outside storage is unavoidable, drums should be laid horizontally to avoid the possible ingress of water and damage to drum markings. Products should never be stored above 60°C, exposed to hot sun or freezing conditions.
