

Power Steering Fluid

Power Steering Fluid contains synthetic polymers and has been specially formulated to meet the requirements of most modern power steering units.

Power Steering Fluid is designed to prevent foaming which causes inadequate lubrication that can lead to performance inadequacies.

Power Steering Fluid should not be used as a transmission fluid or as an engine oil.

Easy to Use:

Power steering units should be checked at least every six months and topped up where necessary. Although the fluid level may be checked hot or cold, it is recommended it be checked whilst hot.

If the power steering fluid is low, check your owner's manual for proper fluid specifications before adding fluid. Do not overfill.

Power Steering Fluid is not recommended for use in Honda power steering units. Always refer to owner's manual for correct lubricant recommendation.

Features and Benefits

- Prevents Corrosion, Oxidation and Wear
- Keeps seals and O-rings pliable
- Use Year-Round
- Helps Stop Leaks

Keeping the world moving since 1866™

Serving more than 100 countries around the globe, Valvoline is a leading marketer, distributor and producer of quality branded automotive and industrial products and services. Products include automotive lubricants including MaxLife™, the first motor oil specifically formulated for higher-mileage vehicles; transmission fluids; gear oils; hydraulic lubricants; automotive chemicals; specialty products; greases, and cooling system products.

This information only applies to products manufactured in the following location(s): Australia

| Part Number | Pack Size |
|-------------|-----------|
| 8631 | 350ml |

PRODUCT INFORMATION

Health and Safety

This product is not likely to present any significant health or safety hazards when used correctly in the right application. Safety Data Sheet (SDS) is available on request via your local sales office or 1800 804 658 or through our website www.valvoline.com.au

Protect the Environment

Take used oil to an authorized collection point. Do not discharge into drains, soil or water.

Storage

Storage We recommend to store all packages under cover. In case outside storage is unavoidable, drums should be laid horizontally to avoid the possible ingress of water and damage to drum markings. Products should never be stored above 60°C, exposed to hot sun or freezing conditions.
