

Engine Stop Leak

Engine Stop Leak is scientifically formulated to reduce or eliminate leaks. Engine Stop Leak rejuvenates and revitalises worn engine seals to original size.

Application:

Engine Stop Leak reduces oil leaks from main bearing seals in petrol and diesel engines. Engine stop leak contains special additives to rejuvenate seals to reduce or stop leaks from main bearings, cam shaft bearing and other engine component seals.

Features and Benefits

Superior anti-oil leak performance

Elastomeric seals that are in contact with hot oil tend to shrink, harden and become less pliable. As a result, oil begins to leak. One solution is to replace the leaking seal; an alternate is simply to add Engine stop leak to the engine oil.

Universal Application

Compatible with petrol and diesel engine oil and contains no harmful solvents or solid matter that may damage engines.

Prevents Engine Damage

An oil leaking engine causes excessive oil and grime build-up on the outside of the engine, reduces engine oil level, which can damage engine due to oil starvation, and unsightly oil marks on the driveway.

Reduces Environmental Impact

An oil leaking engine can also contaminate local surface and ground water.

Directions for use

Add one bottle to crankcase when engine is warm, then idle for 10 minutes to ensure adequate mixing, or drive vehicle for 10 minutes. If leak persists after 500 kilometres, seal may be cracked or broken and should be replaced.

Keeping the world moving since 1866™

Serving more than 100 countries around the globe, Valvoline is a leading marketer, distributor and producer of quality branded automotive and industrial products and services. Products include automotive lubricants including MaxLife™, the first motor oil specifically formulated for higher-mileage vehicles; transmission fluids; gear oils; hydraulic lubricants; automotive chemicals; specialty products; greases, and cooling system products.

For more information on Valvoline products, programs and services please visit www.valvoline.com.au or contact the Technical Hotline on 1800 804 658 for product recommendations.

PRODUCT INFORMATION

This information only applies to products manufactured in the following location(s): Australia

Part Number	Pack Size
8612	350ml

Health and Safety

This product is not likely to present any significant health or safety hazards when used correctly in the right application. Safety Data Sheet (SDS) is available on request via your local sales office or 1800 804 658 or through our website www.valvoline.com.au

Protect the Environment

Take used oil to an authorized collection point. Do not discharge into drains, soil or water.

Storage

Storage We recommend to store all packages under cover. In case outside storage is unavoidable, drums should be laid horizontally to avoid the possible ingress of water and damage to drum markings. Products should never be stored above 60°C, exposed to hot sun or freezing conditions.
