

VPS Brake Parts Cleaner

VPS Brake Parts Cleaner is tenacious when it comes to removing brake fluids, oils and grease. Brake cleaners which “evaporate instantly” or claim to be “fast drying” can leave an oily residue. Dissolved oil, brake fluid and grease are left behind when the brake cleaner evaporates. VPS Brake Parts Cleaner controls the rate of evaporation so dissolved oil and contaminants are carried away, rather than redeposit on the brake parts.

Easy to Use:

For large open areas, simply hold can upright 10-15 centimeters from part to be cleaned and spray. Allow solvent to evaporate if excess is applied. Wipe off with a clean cloth.

Please Note: Always use in well ventilated area. Do not spray on painted surfaces or directly on to hot surfaces.

Features and Benefits

- Removes Brake Fluid, Grease, Oil and Brake Dust
- Contains No Petroleum
- Leaves No Residue

Keeping the world moving since 1866™

Serving more than 100 countries around the globe, Valvoline is a leading marketer, distributor and producer of quality branded automotive and industrial products and services. Products include automotive lubricants including MaxLife™, the first motor oil specifically formulated for higher-mileage vehicles; transmission fluids; gear oils; hydraulic lubricants; automotive chemicals; specialty products; greases, and cooling system products.

Part Number	Pack Size
7260	350g
7251.20	20L

Health and Safety

This product is not likely to present any significant health or safety hazards when used correctly in the right application. Safety Data Sheet (SDS) is available on request via your local sales office or 1800 804 658 or through our website www.valvoline.com.au

PRODUCT INFORMATION

Protect the Environment

Take used oil to an authorized collection point. Do not discharge into drains, soil or water.

Storage

Storage We recommend to store all packages under cover. In case outside storage is unavoidable, drums should be laid horizontally to avoid the possible ingress of water and damage to drum markings. Products should never be stored above 60°C, exposed to hot sun or freezing conditions.
